Connected Panel Communication Network

CONNECTED™ PANEL TECHNOLOGY

Connected™ is a revolutionary, patent-pending technology that connects your mobile devices to your aircraft's panel-mounted avionics.

Evolution Flight Displays are designed to network with a variety of certified avionics from many manufacturers, making the Evolution system a natural nexus for access to and control of flight data.

A Gateway to Integration

The Connected™ Panel system includes hardware, software and application components that provide two-way wireless communications between portable smart devices and panel-mounted avionics. The power to streamline flight-related activities is enabled via Aspen's Evolution Flight Displays and a blind-mounted Connected Gateway box.

Aspen's Connected™ Pilot software application provides configuration of and access to panel communications. Initially, the Connected™ Pilot app will be available for the Apple iPad via Apple's iTunes Store. Development for Connected™ Panel Enabled apps and products is open to other platforms, such as Android, to meet pilot demand.
A Gateway to Innovation

A growing suite of Connected™ Panel Enabled apps from a vibrant community of developers promise to not only make your favorite apps more useful and powerful, but you can anticipate innovation beyond the bounds of any current products. The best uses of Connected technology will be as surprising as they are powerful.

*See aspenavionics.com/availability for product availability dates.*

UPLOAD YOUR FLIGHT PLAN, TUNE YOUR RADIO WITH A TOUCH, RECORD FLIGHT DATA, AUTOMATE MAINTENANCE RECORDS...

THE POSSIBILITIES ARE ENDLESS.

Until now, smart devices have been limited — unable to communicate with onboard systems.
